Abstract. The subject of the study are two interrelated aspects of the problem of legal enforcement of international obligations of the Russian Federation on collective defense. The aim of the work is to resolve the existing contradiction between the needs of the CSTO member States in an effective system of collective security and the system of norms of international and domestic law that is inconsistent with it. The results of the work are applied and addressed to the subjects entitled to the initiative on harmonization of the CSTO legislation and improvement of the strategic planning documents of the Russian Federation.

Key words: military threat, aggression, pre-emption by force, collective defence, sovereignty, international Treaty, military doctrine.

5. Vasilchenko S. V. Concept and principles of interaction of border authorities with the Armed forces of the Russian Federation in the field of protection of national interests of the Russian Federation in the border area

Abstract. The article considers the interaction of border authorities with the Armed forces of the Russian Federation as a phenomenon from the standpoint of an interdisciplinary

methodological approach. At the same time, taking into account the existing points of view and on the basis of the provisions of the current legislation, the author's definition of the interaction of the border authorities with the Armed forces of the Russian Federation in the field of protection of the national interests of the Russian Federation in the border area is formulated and justified, and the principles of its implementation are outlined.

Keywords: interaction, Armed forces of the Russian Federation, national security, national interests, border authorities, border space, forces, means, efforts, phenomenon.

6. Verbitskaya T. V. Correlation of legal mechanisms of achievement of military and nuclear safety

Abstract. Despite the fact that the protection of the state's sovereignty is carried out within the framework of mechanisms to ensure different significant areas of security (national, military, nuclear, economic, environmental, public), military security is fundamental for the state. If the state is a leading nuclear power actively involved in world processes, such as Russia, ensuring nuclear safety predetermines the achievement of international security in the nuclear sphere. To date, nuclear safety has not been singled out as an independent type of security in military law and, correspondingly, a clearly defined mechanism for ensuring it doesn't exist yet. The ratio of military and nuclear security and legal mechanisms to ensure them are not defined. Establishing the relationship between Russia's military and nuclear security as a bastion of state security and significant elements of international security will allow both delineating the framework of legal mechanisms for ensuring military and nuclear security, as well as establishing the existence of common tools aimed at achieving both military and nuclear security.

Key words: security sphere, state sovereignty, legal achievement mechanism, legal means, military threats.

7. Pershina A. V. About the principles of use of the weapon by the military personnel at implementation of law enforcement activity
